SCIS Test Environment Setup for Solupay Virtual Clover Mini

I have implemented a virtual clover device for SCIS.

This is for demo purposes only to show the transaction process between SCIS and the clover mini device.
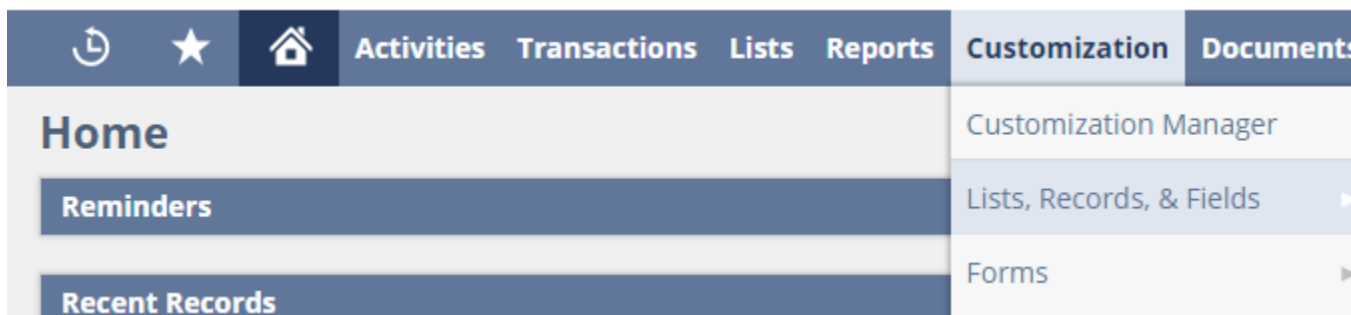

**** THIS WILL NOT CREATE/PROCESS TEST TRANSACTIONS. IT'S ONLY AN EMULATION OF THE ACTUAL CLOVER MINI DEVICE ****

WILL ONLY WORK WITH SCIS Bundle!

How To Setup Virtual Device:

1. Supports multiple virtual devices in SCIS Payment Device setup

   Customization -> Lists/ Records, & Fields -> Record Types

2. Scroll down the list and find "SCIS Payment Device" and click on "List"

3. Click the "New SCIS Payment Device" to create a new device.

SCIS Payment Device List

VIEW Default ▼ | Customize View | **New SCIS Payment Device**
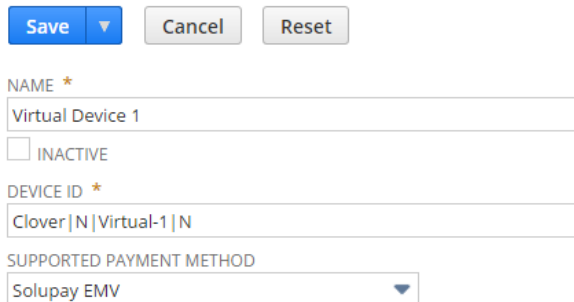

4. Complete all required fields.

NAME => Provide any name for this device (note: this is not the device id)

DEVICE ID => Standard naming layout, separated by pipe symbol |
Layout => Clover|Print Receipt|Device Id|Customer facing
1. Clover is the device type
2. Print Receipt – N (since this is a virtual device and has no printer)
3. Device Id – **It must starts with the word Virtual**. For example Virtual-1, Virtual-2, Virtual-nth….. You can create as many virtual devices as need.
4. SUPPORTED PAYMENT METHOD – must select an EMV payment method. You can create an EMV payment method in Setup->Accounting->Accounting Lists
5. LOCATIONS – select any location or select all locations

How To Use (Open 2 browsers, one for SCIS app and the other for Netsuite):

I. **NetSuite Browser**
   - Log into Netsuite
   - Customization -> Lists/ Records, & Fields -> Record Types
   - Scroll down the list and find "SCIS Payment Devices" and click on "List"
   - Find the virtual device and click "View"

- Click on the "Virtual Device" button to launch the device.

NOTE: This button is available for device that has been designated as virtual.

- Virtual device is ready to use.
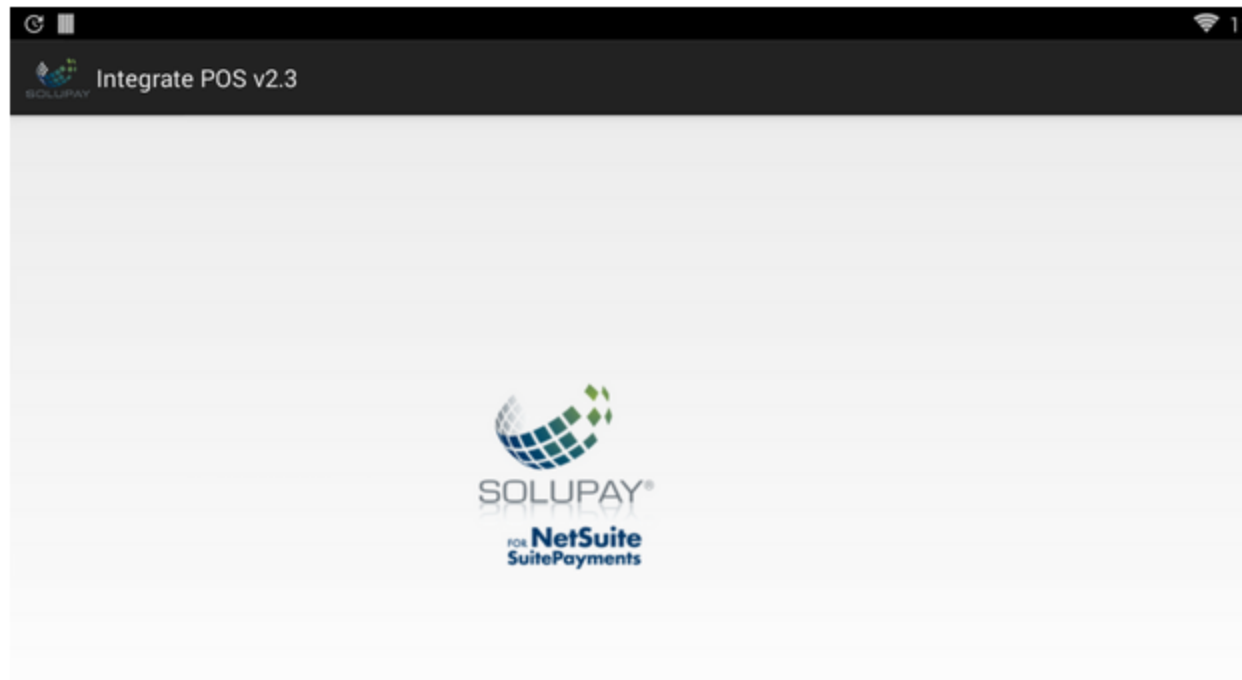

II.   SCIS APP Browser
- Launch SCIS app via browser (Firefox or Chrome browse is recommended) – use this link =>
  https://system.na1.netsuite.com/c.TSTDRV1472101/pos/main.ssp?whence=&n=3#login
- Log in to SCIS
- Add an item and check out.
- Select "Payment Device" and select the virtual device.
- The virtual device will light up and ready to process payment.
- Complete or cancel the transaction payment on the virtual clover and confirm the transaction in Netsuite ERP.

This feature will be included with bundle version 7.00 which is scheduled to be released on Friday.

Let me know if you want a quick walk through tomorrow morning. Wait….it's already tomorrow, so let me know if you want a walk through later in the morning ☺
